

Tracking Page Results

Blue Corporation 15.06.2012

Objectives

1. To allow **unregistered** users to search for courses
2. To allow **registered** users to **search and compare** courses from various universities
3. To allow **registered** users to print and export course comparison results to PDF
4. To track which user has compared which courses
 - a. Record the user ID, course comparison page link and time in the database
 - b. Query the data from the database

Your Task

- To do the point 4a (as mentioned) on previous Slide

Deliverables

- To process the backend so that the information is captured in the database
- Work to be completed in 2 Days.
- Changes to be documented (on a separate document with the Line Number and the code

Expectations

- We will give access **ONLY** to the folder which is required to be worked on
- We will be providing the username and password for both Registered User, connection to database as well as FTP
- You will **NOT** be required to create table.
- You may **NOT** use other **FILES** that you have access to on our server for other projects and/or clients.

Process Flow

User clicks on Compare

Page checks if user is logged in

If user is logged in, results will be shown
